

6.4 UNITS

Clicking on the UNITS button presents a list of units (i.e., tracks) in the tactical display, as follows:

Options are available to sort in any column in descending or ascending order. Clicking on a unit name in the list presents a short list of additional unit information, as follows:

Clicking on CENTER ON centers the tactical display on the selected unit (highlighted in white). Clicking on LAST MAP returns to the previous tactical display. Clicking on the VCC option (not shown above) returns the user to the VCC.

Clicking on AMPLIFY presents a full list of UB tactical data, including track history (if available). Of course, the content of this display depends on the type of track, e.g., ground unit, ship, LINK. The example below contains data on a merchant ship (consult the UB documentation for a description of unit attributes).

The screenshot shows a Netscape browser window with the title "Netscape - [NORDSTAR Attributes [amplified]]". The browser's menu bar includes File, Edit, View, Go, Bookmarks, Options, Directory, and Help. Below the menu bar are buttons for Back, Forward, Home, Reload, Images, Open, Print, and Find. The main content area is titled "Tactical Data" and contains two tables.
